Profile

React developer with over 18 years experience in commercial front-end development, working with the latest web technologies – React/React Native, Node.js/Express, npm/git/webpack, Javascript/TypeScript, HTML5/CSS3, PHP and ASP.NET MVC/C# for clients such as Lloyds, River Island, French Connection, O2, Oxfam, Lexus and PokerStars seeks new challenges and responsibilities. Working with user interfaces, have worked on e-commerce and corporate websites achieving a vast experience in solving challenges. Active and dynamic approach to working and getting tasks done, always finds suitable solutions, with a high personal standard achieving excellent attention to detail and accuracy.

Experience

Dates	Feb 2021 - Current
Role	React developer
Responsibilities	Worked within a few highly performant teams, have been part of an exciting greenfield enterprise project comprising of a high-volume data processing multimedia transcription and analytics application and helped the project move forward using latest tools, workflows and methodologies. Also been helping build highly sensitive form-based applications, improving the existing codebases by adding extra functionality or refactoring. Currently working within the Digital Products department, building and maintaining existing internal and public facing React applications, e.g. New accounts creation - documents upload & checking interface, various in-house platforms, etc. React, Javascript, TypeScript, Redux/Flux, Docker, CSSinJS, Jest/React Testing Library, Material UI.
Employer	Lloyds (Virtusa)
Type of business	Financial services group

Dates	Dec 2013 - Dec 2020
Role	Front end developer
Responsibilities	Dealt with complex user interfaces for major e-commerce retailers (River Island, French Connection, Oxfam) thus improved usability and user journeys. Have also refactored old code bases and built new apps following latest guidelines, using React and various npm libs within Docker containers. Participated in critical projects like refactoring checkout journeys, 'quick view' features, and various reporting and management systems. Helped large traffic sites save money through writing, semantic, compliant code. React/React Native/CSSinJS/Angular, Node.js/Docker, Javascript, TypeScript, Jest, npm/webpack/git, SASS/CSS3, Bootstrap, C#/Razor. UI/UX.
Employer	The Commerce Partnership Ltd
Type of business	Software development agency

Dates	Nov 2011 - Nov 2012
Role	Front end developer
Responsibilities	Developed multiple responsive, mobile first WordPress based websites for some prestigious clients (achieving cross browser compatibility, code optimisation and validation) from bespoke designs, from conception to completion, including post production maintenance, also customised themes and developed various plugins. Refactored websites according to the WAI-AAA standard in XHTML/CSS3. WordPress/LAMP/MySQL, git, jQuery/XHTML/CSS, Bootstrap, Foundation, plugin development.
Employer	Moove Agency
Type of business	Digital web agency

Studies

Dates 2020
